

Digital Doorsign

meovis EasyDoorSign Software

Digital doorsign EasyDoorSign Software

Reach a new level of flexibility in dealing with conference rooms and seminar rooms with meovis EasyDoorSign Software for doorsigns.

You can use meovis EasyDoorSign Software as standalone doorsign (without additional software) or with a direct connection to Microsoft Exchange Server attached to the conference room.

meovis EasyDoorSign Software is available for displays with 7" (17,78 cm), 10" (25,4 cm) and 18,5" (46,99 cm) for example LG, Samsung or Philips Displays.

Book directly at the digital doorsign

The meovis EasyDoorSign Software for a standalone display does not require network access nor any additional software.

Appointments can be added directly via the integrated touchscreen.

Various security features allow only authorized persons to add appointments at the digital doorsign.

Adding appointments in just 3 steps directly at the digital doorsign.

Changing or deleting an appointment / booking can also be done directly on the door sign. Depending on the used template.

The customization of the layout / design of the display allows a seamless integration into the company regarding CI / CD.

Book via Microsoft Exchange Server

You are already using Microsoft® Exchange Server?

The meovis EasyDoorSign Software perfectly fit into your infrastructure. Attach displays with EasyDoorSign to your conference rooms.

The direct connection of the screens to the Microsoft Exchange Server makes it possible to seamlessly integrate the displays with meovis EasyDoor sign software in the existing network infrastructure.

Displays with meovis EasyDoorSign are integrated into the network via WLAN (optional via LAN). This saves a cumbersome and costly cabling of the displays.

At the place of installation only a power connection (e.g. from a light switch in the room) is required.

Advantages

- ▶ cost-effective purchasing
- ▶ use as standalone doorsign without any additional software
