Software solution

meovis Room Management Add-on module

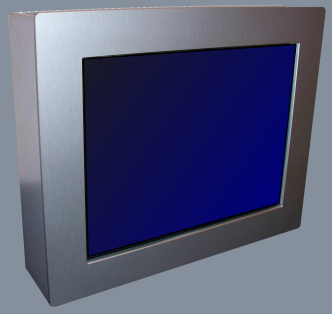

Room Management Add-on module

The Room Management add-on module can be coupled with the meovis Digital Signage base system at any time.

This high-performance module provides a complete room booking system for different applications.

Benefits at a glance:

- Savings in time and costs
- Access via browser (time and location-independent)
- Management of multiple locations via a single system
- Can be linked with Microsoft® Exchange Server
- Fully automatic display of bookings on screens
- Easy addition of bookings
- Quick modifications to bookings
- Different display types can be actuated (radio, passive display, Client Player PC displays)
- Can be used by any organisation from a small business to a worldwide corporation

On-wall door sign

Sample layouts

The information to be displayed on signs on buildings, floors or rooms can be fully customised to the company's corporate image.

A combination of news/advertising and directional information (split screens) for each display is also possible.

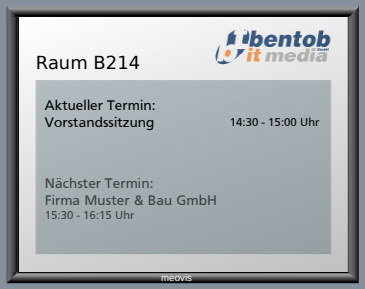

A few sample layouts:

Sample layout foyer sign

Sample layout floor sign

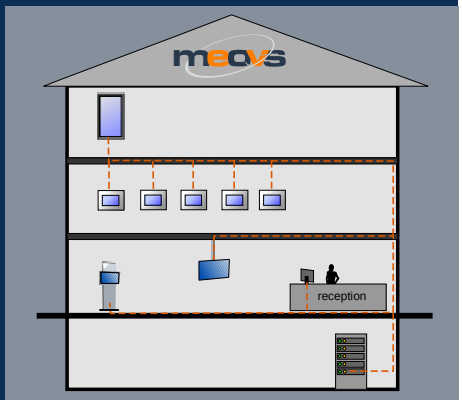

Sample layout door sign

Digital guidance system

Management and control of a complete direction system.

Receive your visitors at the entrance, and guide them via building, floor and room signs directly to the desired destination.

Functions:

- Any number of rooms can be managed
- Administration of catering / resources
- Extremely easy operation
- Clear display of bookings
- Layout can be completely customised to the company's corporate image
- Interface to Microsoft Exchange Server available as an option
